# Signature

Waffle Towel

It is recognized with its famous waffle and diamond pattern. It is more light and thin than terry cotton. However it has the same absorbency property because of the cotton structure. Since they are lightweight, cotton waffle bathrobes are generally used in spas, saunas and by poolsides.

## SOFT TOUCH MICROFIBRE

### BATHROBE

Microfibre fabric is manufactured with very small fibers by being woven or whipped into millions of tiny loops. Thus, a type of luxury and plain fabric is revealed. Microfibre is a combination of the light, breezy and silk touch. And it also has the breathable quality of cotton. Because it contains cotton and millions of tiny loops of fibre, it has a high absorbency and softness.

### LUXURIOUS PLUSH MICRO-FIBRE BATHROBE

Plush fabric is so soft and gentle. Thanks to its thick structure, plush bathrobes keep you warmer. It is so comfortable and perfect for comfy lounging. Soft and fluffy texture of plush robes is good for your skin and does not irritate it. Plush micro-fleece fabric also has a very absorbent structure.

Bath Robes

*Hospitality is

Not Perfection*

*Terry Cloth*

Terry cloth fabric type is made of a very absorbent material. Terry cloth robes are usually made from premium Turkish cotton. Classy and soft cotton terry fabric is available in a large variety of weights and thread counts. As the thread count is increased, the absorbency property of the fabric increases. It is a heavy and thick fabric. Terry cotton is being used in baths, showers and Turkish baths for decades. Thanks to its being organic cotton it is so soft.
